

## product description

This round opposed blade damper of aluminum alloy is utilized with round ceiling diffusers and mounts with a series of legs onto the neck of round diffusers. It is a screwdriver-operated unit.

**model OB-R**

## product description

This unit is identical in design to the OB-DMR except that, in this model, blade adjustment is accomplished by using a  $\frac{3}{8}$ " square rod on the end of the unit that protrudes through the duct. There is a factory-furnished round disc which indicates the "OPEN" and "CLOSED" positions and mounts on the exterior of the duct.

**model OB-DMQ**

## product description

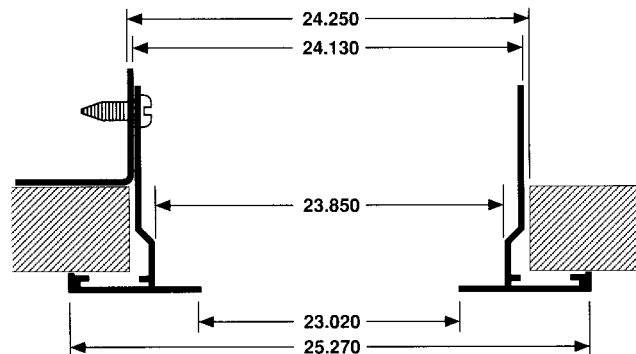

This model is an extractor with worm gear control that is operated with a hand crank within the duct. The blades are 24-gauge galvanized steel, the base is 18-gauge, and the straps are 16-gauge.

**model EXR-3**

## product description

Auxiliary frame to mount T-bar diffusers on drywall or similar ceiling

**model PFT**
